

You ask for pictures, not many words. Some day we may be able to speak in pictures and music, but now we are word-people, and it will take words to dig out the death-root.

In the pages here, the top half of one was filled with pictures, worth perhaps more than a library of books trying to describe Nature. I am not sending those pictures. (Some are here, to begin this letter.) The problem is this: look at the picture titled "Chaos", and then the one titled "flows". Between the straight line (tension) and the circle (pressure) is a very special curve I call the  $90^\circ$  spiral. In free motion ("Chaos") the  $90^\circ$  spiral is the exact curve of equalization between tension and pressure. All motion in the universe gravitates toward that curve as the resolution of stress. It is the foundation of all life, storms, etc. It is why and how Chaos comes naturally to Order  At exactly  $90^\circ$  both tension and pressure have infinite power of effect, which leads to the instant resolution: stress relief in some form of deformation. The  $90^\circ$  spiral is the key to nature's infinite Creative Power. Without the exact curve, the ES proof is impossible. I want to share this knowledge with everyone, but the spiral itself teaches where that will lead - see p. 5. When you can see in the dark I will show you the spiral's form.

It is the "Central Issue" that is important now (p. 3). It is written in terms of Christianity, but applies to every religion, every culture in the world - even to the Native American "Indian", who I think developed more reverence for the earth than any other culture. Do you know the word "Shaman"? A Shaman is not a priest. Every one is different. When we understand the Shaman we will finally come to peace with nature and ourselves. Only then will we have inside ourselves the infinite Power of Creation to perform any "miracle" we wish. With the Power, is given the Power of self-knowledge and self-control - the ability to see in the dark.

I have rearranged the pages here to save you some reading. The "Open Letter" is not necessary, unless you care to read it.

I am delighted that you wrote - a very hopeful sign.

yes, with Love,  

I wish we could meet!
