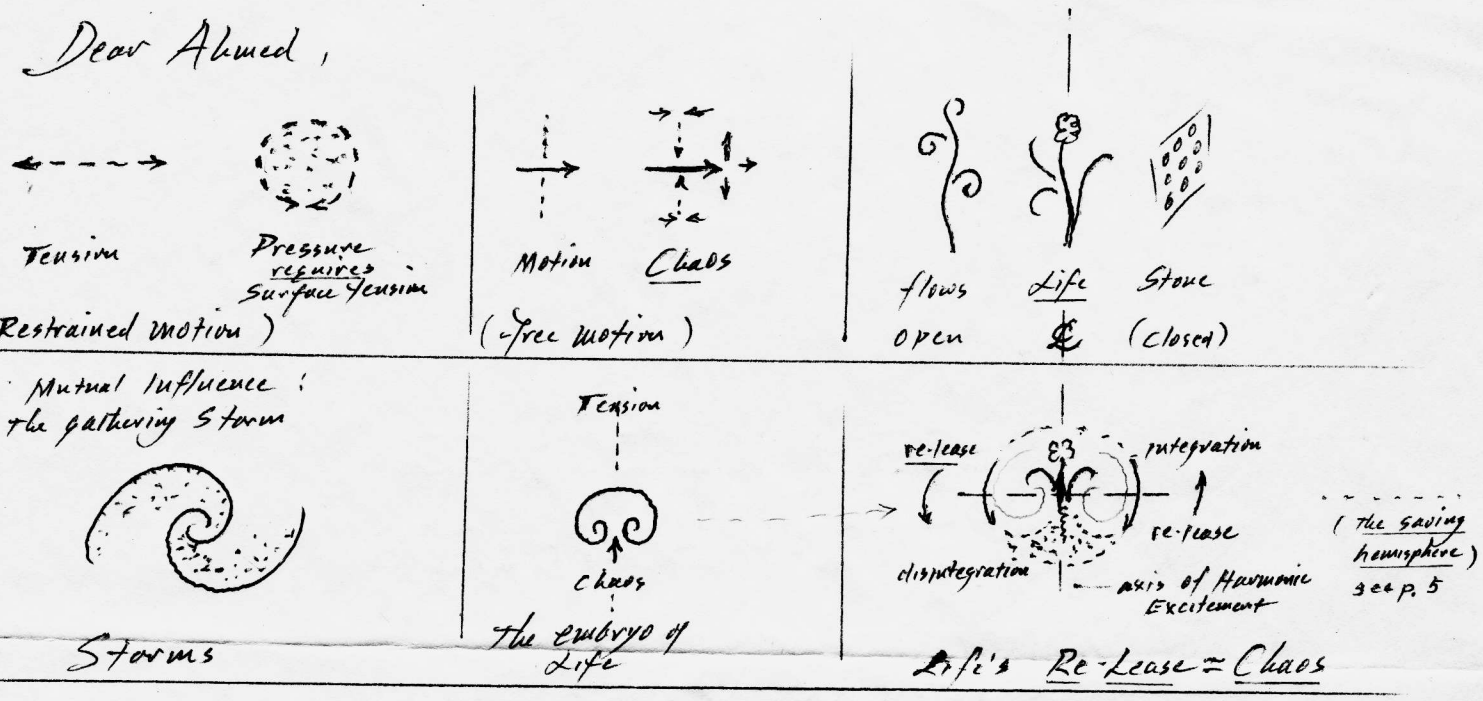
Dear Ahmed,



Praise be - A Miracle! - I have written nothing for 6 months until what's here. Returning from getting copies - there was your letter! How did you know it was time?

You ask for good news. This time very exciting news - in a very depressing package. You will have to understand <u>both</u> sides, to understand me at all. I understand your music love and light, and you are right, but you live in a future-dream not yet made possible in the real world. There is a death-root in us all, and no love and kindness will destroy it - it only lets it grow deeper. (see "the Central Issue")

I think I am now ready to do the ES proxy ("Energy Synthesis - Nature's Way) - the working model of the atom and how it works - the working model of us and how we work - all things, One thing - reduced to essence - the working demonstration! Good news? Free energy in the hands of present <u>humans</u> <u>will destroy this planet</u>!

I need you Ahmed - I need very much someone in your part of the world who can understand me - someone from a different culture, and someone from the Arab world. Do you know what free energy will do to your part of the world? Look at the Jews still fighting 2000 year old <u>Religious Wars</u>. Look at Arabs killing each other over <u>Oil</u>, and what the slightest change in the price of Oil does to the <u>entire</u> world economy! I am ready to toss a lit match into the very center of a world bomb and there isn't a Seer on earth who can hear my warning. I am asking you to turn away from the light, and learn to see in the dark.

Without that, you are nothing but a moth attracted to the light.
